#### **LORAN-C**

LORAN-C, an acronym for LOng RAnge Navigation, is an electronic aid to navigation consisting of shore-based radio transmitters. In accordance with the DHS Appropriations Act, the U.S. Coast Guard has terminated the transmission of all U.S. LORAN-C signals as of February 2010, rendering them unusable and permanently discontinued. This termination does not affect U.S. participation in the Russian American or Canadian LORAN-C chains. U.S. participation in these chains will continue temporarily in accordance with international agreements. For more details, view <http://www.navcen.uscg.gov/>. The Coast Guard strongly urges mariners accustomed to using LORAN-C for navigation to shift to a GPS navigation system and become familiar with its operation. NOAA will begin removing LORAN-C lines of position from all of its charts as new editions are published.

**speed limit.** In 2007, the controlling depths were 4.5 feet (6.0 feet at midchannel) from the entrance to the anchorage basin at the head of the cove, except for shoaling to 0.9 foot in the left outside quarter of the channel between Buoy 3 and Buoy 7. The anchorage basin, 0.5 mile above the entrance, had depths of 3.6 to 6.0 feet and the two anchorage basins, 0.7 mile above the entrance, had depths of 4.3 to 6.0 feet. The anchorage basin at the head of the cove had depths of 5.0 to 6.0 feet with gradual shoaling to 1.6 feet towards the ...
